

PENNSYLVANIA RAPID BRIDGE REPLACEMENT

WallacePancher Group completed PADEP GP-11, GP-8, GP-4, and Small and Standard Joint Permit application packages for over 450 bridges as part of Pennsylvania's Rapid Bridge Replacement Program. WPG coordinated with other sub-consultants who prepared the hydraulic studies and bridge design plans to compile the information needed for the permit applications.

WPG performed interdisciplinary reviews on documents completed by other consultants to ensure consistency, completed PADEP permitting registration forms and documents, and compiled additional information for PADEP's review.

WPG coordinated with various PADEP Regions and County Conservation Districts from across the Commonwealth to obtain permit approvals.
