

ROUNDBABOUTS

Richland Engineering Limited (REL), a WallacePancher Group company, has designed numerous modern roundabouts that provide safer, more rapid movements for traffic as well as aesthetic improvements that fit into the character of the communities where they are installed.

REL has conducted the traffic studies, design, and construction observation for projects throughout Ohio, both on behalf of the Ohio Department of Transportation and various County Engineers.

Roundabouts have included elements such as stamped concrete, retaining walls, curb ramps, landscaping, and traffic signal replacement.
