

HAMILTON AVENUE REHABILITATION

WallacePancher Group was retained by the City of Farrell, Mercer County, Pennsylvania to prepare design plans for the Rehabilitation of Hamilton Avenue.

Approximately 1,700 feet of Hamilton Avenue is proposed for milling and paving, manhole adjustments, and storm sewer inlet repair. Additionally, sidewalks will be added and/or replaced, as well as ADA-compliant ramps, landscaping and pavement markers are planned.

WallacePancher Group prepared all design plans for approval by the City as well as PennDOT District 1-0, a Categorical Exclusion Evaluation (CEE), and all bid documents for construction.

SERVICES PROVIDED:
